PC, Laptop, Server

PC

We can take care of everything including purchasing the equipment, configuration, and installation, thus ensuring a seamless upgrade. We also provide maintenance and support for all of our ICT products and software with our highly trained in-house engineers

Laptop and Notebooks

As with PC Desktops, we are on hand to source the correct equipment and can source all software packages and accessories.

Server

A server runs a specialized operating system designed to support many users. It's engineered to run multiuser applications such as email, messaging, and print servers; shared calendar programs; databases; and enterprise resource planning. A server also makes it easy for your employees to share data and collaborate, since it operates as a central repository for all of your documents, images, contacts, and other important files. Setting up a virtual private network that you and your employees can access the data on the server remotely from anywhere you have Internet access. On top of that, a server can automatically back up your desktop and laptop systems, so you'll never lose critical data if one machine fails or is lost or stolen.

Power solutions

Wide Knowledge is a national vendor-agnostic solutions provider of power products and services for IT, manufacturing facilities, and telecommunication applications. With access to such a wide range of power products and services for both AC and DC applications, we offer customized turn-key solutions that simplify project execution and procurement with a single point of contact. Power Solutions carries and stocks a complete line of UPS Systems from all of the leading manufacturers. With one of the most comprehensive product offerings available on the market today, we are an industry leader and globally recognized provider of technologically advanced power quality solutions. Solutions ranging from 100 VA to 1 MW or more, single phase to 3 phase and run times from 3 minutes to several hours are available for immediate purchase. We can provide the technical assistance you need to select the proper UPS System for your needs. Power Solutions offers a variety of management and monitoring options for your APC, MGE and third-party UPS and data center infrastructure equipment. Our UPS management consists of software, network management cards, and peripherals for UPS management, monitoring, and safe system shutdown.

Network solutions

At **Wide Knowledge** for IT Solutions, we offer structured cabling support for your building or campus-wide telecommunications system that is reliable and utilizes the ultimate in performance to exceed your expectations. Our highly skilled service technicians can install any type of structured cabling or low voltage system, ensuring complete consistency that is network-wide and optimized to meet your communication needs.

Wireless networking provided by **Wide Knowledge** will streamline your organization's operations and allow scaling according to your project's specific requirements. Because of our extensive capability, we offer custom wireless network solutions for any size business. Fiber optics is an innovative and attractive technology that uses glass or plastic threads of fiber to transmit data via light waves. **Wide Knowledge** for IT Solutions is a recognized leader in fiber optics installation, combining proven technical skill with attention to detail that is demanded for the meticulous setup.

Storage and backup solutions

Backup storage is primarily an additional storage device used for keeping backup data. Typically, it is external to the system, server, or device for which the backup data is created, such as a local/remote storage server. The backup storage itself can be a hard disk drive, tape drive, compact disk drive or any mass storage medium installed within a computer or storage server. In enterprise IT environments, the backup storage medium/technology used can be RAID, a storage area network, or a network-attached storage system. Cloud storage backup is a strategy for backing up data that involves removing data offsite to the managed service provider for protection. It can either replace or complement on premise backups.

Wide Knowledge

Others and accessories

Accessories such as a keyboard and mouse may be essential in order to operate your computer. Others - such as graphics tablets and barcode readers - may be useful for specialist tasks. Speakers, video cameras, headphones, microphones and headsets are useful for video conferencing, placing (VoIP) calls and listening to music.
